E911 Phase II Location Technology Information

- (1) Type of Technology. PCS Wisconsin is a PCS licensee but has not yet built out its network or commenced operations. It does not offer real time, two-way switched voice services that is interconnected with the public network. PCS Wisconsin is continuing to develop its network buildout plans and has not yet selected the Phase II location technologies that it will deploy in its network. PCS Wisconsin will file an amended report following its selection of such technologies.
- (2) Testing and Verification: PCS Wisconsin has not yet tested, or determined a manner of testing, any ALI solution and has not selected technologies or vendors. However, upon its selection, PCS Wisconsin will follow the Office of Engineering and Technology's guidelines for determining accuracy as set forth in OET Bulletin No. 71.
- (3) Implementation Details and Schedule: PCS Wisconsin will install the hardware and software needed to implement its chosen technologies following its selection. Assuming that the vendors selected by PCS Wisconsin will be able to provide hardware and software implementing the selected technologies in a timely manner, PCS Wisconsin roll out the installation of the ALI technologies in conformance with the FCC's rules and regulations.
- (4) PSAP Interface. As PCS Wisconsin has not yet determined the technologies that it will adopt, it does not know what changes to hardware and software will be necessary to transmit Phase II data to PSAPs. However, PCS Wisconsin expects that transmission will take place over the public switched telephone network in accordance with standards adopted by the PSAPs' equipment vendors.
- (5) Existing Handsets. PCS Wisconsin does not currently have customer handsets.
- (6) Location of Non-Compatible Handsets. PCS Wisconsin has not determined how it will locate non-compatible handsets. This determination depends on the network buildout plans which have yet to be completed.
- (7) Other Information. PCS Wisconsin has not received any Phase II requests from PSAPs and does not believe that it currently has other information that will assist the Commission and affected parties in monitoring and coordinating the deployment of E911 Phase II in accordance with the timetables set forth in the Commission's rules.
